

Brass Elbows & Tees

Elbows: Used to change the angle or direction of the pipe run. Most commonly in 90 degrees and 45 degree turns. A tee, the most common pipe fitting, is used to combine or divide fluid flow. It is available with female thread sockets, solvent-weld sockets or opposed solvent-weld sockets and a female-threaded side outlet.

Features

- Solid Heavy-Duty Brass Construction
- 90 Degree Female Elbow
- Best used with brass, steel or iron pipes for moving water, oil, air, natural gas and liquefied petroleum products.
